

True or False ?

Add and subtract simple fractions

$$\frac{1}{4} + \frac{3}{8} = \frac{4}{12}$$

False

To add two fractions, they need to have the same denominator. Then you can add the numerators.

$$\frac{1}{4} + \frac{3}{8} = \frac{2}{8} + \frac{3}{8} = \frac{5}{8}$$
