

6 x tables

1) Fill in the gaps below:

6		18			36
---	--	----	--	--	----

2) Create a word problem that requires you to use the 6 x table.

3) Find all the number facts you can for the triangle below:

4) James buys 6 games at £9 each. How much does he spend altogether?

6 x tables

5) Fill in the gaps below:

$6 \times \underline{\quad} = 24$

$48 \div \underline{\quad} = 6$

$6 \times \underline{\quad} = 54$

$30 \div 6 = \underline{\quad}$

$6 \times \underline{\quad} = 18$

$72 \div \underline{\quad} = 6$

6) Fill in the gaps below:

	2.4	3.0			4.8
--	------------	------------	--	--	------------

7) David says "I'm not confident with my six times tables but I know my threes so I can use these to help."

Is David correct? Explain your reasoning.

8) Sarah says "I know my 6 times table so I can work out 60×70 without using a written method."

Explain why Sarah can do this.

6 x tables

9) Andrew is buying some new computer games. He buys six new games for £11 each. Draw a representation of this below before writing out the calculation and finding the answer.

10) Write the number sentences for the diagram below:

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$
